Combating Inflation

In order to combat inflation, you have an option to select indexation in your policy. Selection of this option will increase your premium automatically each year by a limit specified by the company.

However, you retain the right to cancel the indexation if you wish.

Automatic Cover Maintenance

In case you cannot meet your premium payments after the first policy year, you will still be eligible for the life insurance cover, as long as your plan's cash value is sufficient to pay for charges made against your policy.

Ad hoc Premium Payments

You can invest extra funds available with you at any time during the term of the policy and top up your regular investments.

Encashment Before Maturity

You can withdraw your funds (either fully or partially) after completion of two policy years, provided you have paid premiums for two years.

- **Partial Withdrawal:** If you need to withdraw cash for meeting some emergency needs, but do not want to surrender the policy, you can withdraw any amount, provided that the remaining cash value (as may be reviewed by Jubilee Life) of your policy after withdrawal is greater than or equal to Rs. 18,000. The sum assured will be reduced by the amount of partial withdrawal made.

- **Full Policy Surrender:** At time of surrender, you will be paid in full the Cash Value of your fund. However, surrender in early policy years may result in lower cash values.

Pricing Methodology

Jubilee Life follows forward unit pricing methodology. It is worked out by dividing the total value of investments in the fund by the number of active units in the fund as of pricing date.
