

DIGITALIZATION OF FX CASES

SYSTEMS & OPERATIONS DIVISION

Contents

Introduction	3
Registration of Customer:	3

Introduction

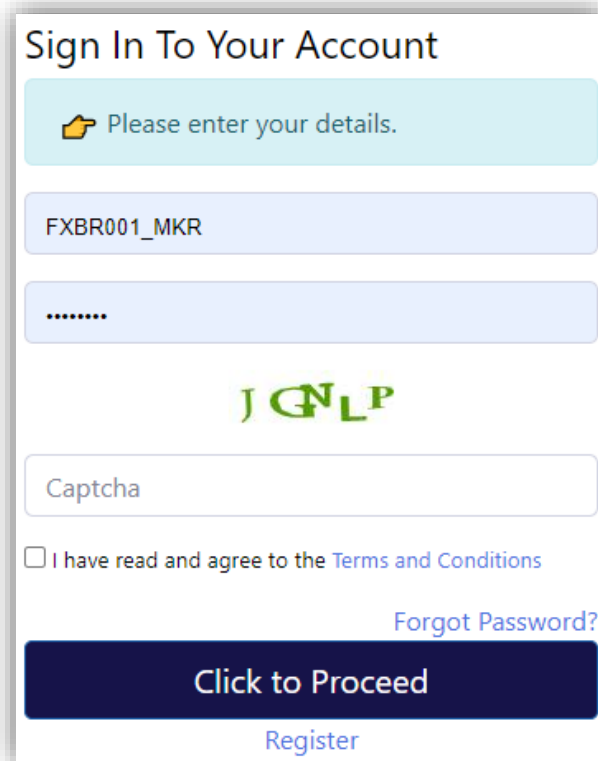

In pursuance to SBP instructions, Askari Bank Limited has developed an In-House web based portal for Digitalization of FX Cases which will facilitate customers to initiate all FX related cases from their offices via self-registering on the portal. The FX Portal caters requests of all type of customer i.e. Sole Proprietors, SMEs, Corporate and Individuals etc.

Registration of Customer:

An interface has been made available for customers where customers will register themselves in order to initiate and forward FX related requests to Bank through Portal. The customers will access the portal using following URL and will proceed for registration by inputting the required details.

URL: <https://securedfx.askaribank.com/digfx>

For registration, customer will click on register button and will insert required details along with OTP automatically sent by system on customer's registered Mobile number or Email address.

User Registration

Registered Successfully. Please Contact With Your Branch For Activation

The request for Customer registration will be made available in portal for Branch Users for review and approval / rejection. After successful registration, the customer will login the portal and will have access to the following options.

The customer will have access to numerous case categories to initiate request. The customer will select the appropriate Case Category and Case Title from the available list of values and will input required information in the system. A system base check list is already been made available in the system for uploading necessary documents in the system. The customer will also have the options to search / edit and view the discrepant cases.
